

Rory McGreal is a Professor and Associate Vice-President, Research at Athabasca University – Canada's Open University. He has been a supporter, developer and user of OERs for many years. He is presently on the Board of Directors of the Open Education Foundation and as such has supported the hosting of WikiEducator at AU. He is also the AU representative at the OCW Consortium and has been a lead player in opening up content at the university, supporting the development of the AUSpace open access repository.

He has published numerous monographs on various aspects of e-learning and has presented keynote addresses, papers and workshops at many national and international conferences. He has edited a book on Learning Objects and written scholarly articles on OER issues including interoperability, deployment, copyright, etc. His recent research experience has been in the application of learning objects and the creation of learning object repositories enabling content to be output to mobile devices.

As an applied researcher, his investigations have been responsible for the implementation of a mobile device accessible digital reading room. He has considerable experience as an evaluator of educational software and in the implementation of technologically enhanced knowledge initiatives, including studies and reports for CANARIE, Health Canada and the Commonwealth of Learning.

Rory was the founder of the world's first e-learning website for TeleEducation and one of the world's first metadata learning object repositories. He is the recipient of the Wedemeyer Award as an outstanding distance education practitioner.
